

风电解决方案

Solutions for Wind Generators

旋转电流传输系统

凡是涉及到风力发电整机中电流的旋转传输，Morgan Rekofa GmbH 的产品都可以给您提供完美的解决方案。无论有关整机避雷接地装置还是控制风车变桨的电流及数据传输系统：我们郑重向您推介我们的产品。

ROTARY TRANSFER SYSTEMS

When you need Rotary Current Transfer for your Wind Energy plants, products of MORGAN REKOFA are the right solution. For high currents for earthing and lightning protection as well as for control current and data transfer for pitch control: we are looking forward to present you our solution!

海基应用

- 防海蚀不锈钢外壳
- 动力及数据传输的组合 (Profibus, Ethernet)
- 整合加热器
- 工业标准连接插头

For Offshore applications

- seawater resistant stainless steel casing
- combined power and data transfer (Profibus, Ethernet)
- integrated heating element
- connectors as per industrial standard

金线导电滑环 + 全不锈钢外壳

- 动力，控制电流及数据传输的组合
- 小型而完备的传输系统
- 保护等级最高可达IP65
- 整合编码器 (可选)

Gold Wire Slip Ring Transmitter in Stainless Steel Casing

- combined power, control current and data transfer
- small and compact transfer system
- protection up to IP 65
- integrated encoder (optional)

我们的导电滑环所具有的共性:

- 产品寿命十年或超过7000万转
- 5年免维护
- 抗震（抖）动
- 无需润滑
- 动力传输可达400A（应用金属电刷）或80A（应用金线技术）

FOR ALL SLIP RING TRANSMITTERS APPLIES:

- *lifetime 10 years or 70 million rotations and more*
- *5 years maintenance free*
- *shock and vibration proof*
- *no lubrication necessary*
- *power transmission up to 400 A with metal-graphite brushes and up to 80 A with goldwire*

组合机型：针对动力和数据传输应用不同技术
组合解决方案：金线和金属电刷的组合
灵活的数据及动力传输
多种应用版本
Combined unit for power and data transfer
Hybrid design: Goldwire and Metalgraphite brush system
power and data transfer flexible as per your requirement
different versions available

接地碳刷：避雷接地专用刷架
稳定载流达1000A
结构坚固
寿命持久
高接触可靠性
Earthing Brushes - Brush Holders for Lightning Protection
up to 1000 A constant load
rugged design
long lifetime
outstanding contact reliability

请告知我们您的具体技术要求！我们的导电滑环也可与液压旋转接头结合。

PLEASE LET US HAVE YOUR DETAILED SPECIFICATION! OUR SLIP RING TRANSMITTERS ARE ALSO AVAILABLE WITH MEDIA DISTRIBUTORS.
